7 November 2012

AIS DISCREPANCY REPORTS

July to September 2012 (Quarterly Report)

1 The Maritime Safety Committee, at its eighty-third session (MSC 83/28, paragraph 4.34) in October 2007, requested Member Governments and organizations with consultative status to submit to the Organization details of ships operating either without AIS or with AIS incorrectly configured, reported by ships entitled to fly their flag. Such details should include, where possible, ship name, IMO number, call sign, date, position (latitude and longitude), and details of the anomaly. The Secretariat was requested to promulgate such information by means of an MSC circular on a quarterly basis.

2 The Secretariat continues to receive monthly AIS discrepancy reports on vessels found to be transmitting incorrect AIS data. Analysis of the information shows that, in the majority of cases, the errors relate to the transmission of the wrong IMO number, MMSI (Maritime Mobile Service Identity), call sign and name for a particular ship. These information items relate to fixed or static information, which is entered into the AIS on installation and need only be changed if the ship changes its name or undergoes a major conversion from one ship type to another.

3 Member Governments and international organizations are invited to note the information provided in the monthly AIS discrepancy reports for the period July to September 2012, as set out in the annex, and bring them to the attention of all parties concerned.
